

Class 5's homework grid – Spring Term 2

Choose at least **one** of these tasks and be creative. I have made the stimulus fairly non specific so that you can take the idea in any direction you would like to go in. Enjoy, create and be innovative!

I will continue to set Y6 revision homework so for the Y6 children, this grid is entirely optional.

Our topic this time around is Steel.

Find out what you can about Sheffield Steel –why was it world famous?	Create a stunning piece of artwork inspired by fire and the steel making process.	How is steel used today? Find and present examples that will amaze and astound the class.
Create a presentation or chart to show how steel is made.	The owners of Meadowhall want to open a new section especially for children. Design what this area will be like.	Write an epic adventure story which is set in our local area.
Around Sheffield there are a number of statues and sculptures that represent the city's history. Can you create a design to represent our school? You could either draw this or make it!	To link with our PHSE work – design a poster that we could use in school to promote a positive self – image. Remember, only perfect presentation will do. You could use ICT if you wanted. Make it original, clear and think of your target audience.	

For all children:

Please can I stress the importance of keeping up with Mymaths and TT rockstars, I am finding that a number of children are not as efficient as I would like them to be with basic calculations and times table knowledge is at the root of this. TT rockstars provides a stimulating and fun way to learn these vital facts and improve speed. Please can you contact me if you have any trouble accessing these online resources.

Please could all finished homework be returned between Monday 8th and Wednesday 10th April. We will then celebrate the work that the children have done in the final week of the half term. As usual , contact me in school if you have any queries.
