

Keep Your Kids Safe On The Internet

Keep the computer out of your child's bedroom or any other unsupervised area.

Do not install a web-cam. It is dangerous to put images on the internet.

Set household rules regarding online activities and safety guidelines.

Find out what computer safeguards are utilized by your child's school and at the homes of their friends.

Utilize parental controls provided by your service provider or blocking software.

Instruct your child never to arrange a face to face meeting with someone they met online.

Check your computer's internet history frequently.

Talk to your child about sexual victimization and potential online dangers.
